

An Important Safety Message From Cornwall Community Fire Co.

WHEN SECONDS COUNT ...

First Responders can't help you if they can't find your house. The problem is that fire, police and ambulance responders have difficulty locating houses with poorly visible house numbers. This delays response time in emergencies . . . "when seconds count".

Emergency responders need house numbers that are easy to spot, day or night, as an emergency vehicle approaches your house from either direction.

REFLECTIVE ADDRESS SIGNS – APPROVED FOR USE THROUGHOUT THE USA

The preferred sign is green with 3-inch white reflective letters on both sides, like a street sign. It's 6x18 inches aluminum with ¼ inch diameter holes near the corners for mounting. Numbers can be positioned vertically or horizontally. Cornwall Fire Company supplies the signs alone with your house number on both sides for \$ 25 or the sign mounted to a 3-foot aluminum stake for \$35.

INSTALLING THE SIGN

Choose a mounting location so the sign is visible to emergency vehicles approaching your house from either direction on the street.

The most common mounting location is vertically on the front or back of the mailbox post.

Vertical on stake in lawn*

Vertical on house near street

***When mounting to a stake in the lawn, be careful not to drive the stake more than 12 inches into the ground to avoid hitting underground water, phone, electric, gas or cable lines.**

Horizontal above mailbox

Vertical on fence post

OTHER BENEFITS OF THESE SIGNS

High visibility signs help traffic navigate through the community. Those delivering anything from pizza, fuel oil, packages, to furniture no longer have to vainly search for the right address. Signs also help customers find a restaurant or business. Safety may also be improved because drivers can spend more time watching the road without being distracted trying to read obscure building numbers.
